

ABSTRACT OF THE DISCLOSURE

A method for setting configuration data of a printer for a printer driver in a server is provided, in which the server is used in an image printing system that includes a client, the printer and the server including the printer driver for the printer. In the method, the server stores the configuration data obtained from the printer, and a configuration data obtaining part in the server reads the stored configuration data according to a request from the printer driver, and sends the configuration data to the printer driver.
